Dear Well Wishers,

The third wave of COVID-19 in Kolkata and the rest of West Bengal is being triggered by the new variant omicron, along with the previous delta variant.

The astronomical rise in the number of cases in a short span of time, less severe infection as well as the fact that many people were being affected **despite taking two doses of COVID-19** vaccines pointed to omicron's role. As per the records **more than two-thirds of the people found affected per day but the cases at ground level is five to ten times higher than the reported ones.**

With your support, we reached out to the large number of people in 2021. We once again need your help and support to reach out to affected individuals on immediate basis.

### How Can you Help?

- 2- By Providing Food Support i.e one hot protein large meal to affected individuals
